

Core Solutions Powered By Innovation™

About Us

At Innocor Foam Technologies®, we are committed to providing innovative solutions to meet our customers' business goals. As a national manufacturer of polyurethane foam with more than 45 years of experience, we take pride in maintaining strong customer partnerships and the proven quality of our products. We manufacture all of our foam in the United States with an environmentally friendly manufacturing process. All of our products exceed federal standard safety requirements.

With 22 facilities nationwide, we offer a broad range of superior foam solutions for various industries including bedding, furniture, transportation, medical, automotive, packaging and novelty.

Our Commitment

As your elite foam supplier, Innocor Foam Technologies is dedicated to providing you with the best results from concept idea to final product. We start with intensive market research to develop innovative solutions to fit you and your customers' needs. All of our foam is then lab tested for quality and performance. Our team takes a step further by testing all of our foam with consumers to ensure value and satisfaction.

Our Footprint

At Innocor Foam Technologies we produce all of our foam in the United States. With a manufacturing footprint that spans the nation, we deliver quality and reliability to serve our customers' business goals. All of our pouring facilities are equipped with laboratories that test in accordance with ASTM standards. A team of Lean Six Sigma professionals lead our Continuous Improvement Programs and precise testing for product performance and safety requirements that meet or exceed industry and regulatory principles.

Our Foam

Did you know that you probably use foam from Innocor Foam Technologies every day?

We support an array of industries with conventional and specialty polyurethane foams. All of our foam is manufactured using an environmentally friendly, state-of-the-art foam pouring process. Our customer commitment continues with customized specifications tailored to meet your needs.

Innovative Fabrication Capabilities

Our in-line 3D cutting tools provide consistency and precision for optimum design.

Technology Enhancements

Whether it's providing coolness, freshness or sound deadening, our innovative technologies can help provide the foam solution that you need.

Made in the USA

All of our foam is made in the USA for quality you can trust and efficient service.

CertiPUR-US® Certified

CertiPUR-US® certification requires low-emissions for indoor air quality and made without ozone-depleters, formaldehyde, PBDE's, prohibited phthalates, lead, mercury and other materials of concern.

We Recycle

Internal Foam Scrap Program and Customer Scrap Buy-Back Programs allow us to play a part in protecting the environment.
